PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience designing and delivering backend, full-stack, AI, and enterprise software systems using Python, Django, FastAPI, React, and Vue.js. Experienced in API architecture, workflow automation, OCR and document processing, database-backed business applications, and modernization of enterprise systems.

Strong background in translating business requirements into secure and scalable technical solutions, with experience across financial services, insurance, manufacturing, AI, and enterprise environments. Comfortable owning systems across the full delivery lifecycle, including requirements analysis, architecture, implementation, testing, deployment, technical documentation, stakeholder coordination, and production support.

PROFESSIONAL EXPERIENCE

Omniscien Technologies

Senior Python Backend Engineer

Apr 2026 – present

- Build document **ingestion**, parsing, normalization, and **metadata extraction** workflows for multiple document formats using Docling and related document processing technologies.
- Design and develop **RAG** pipelines and document retrieval systems using Weaviate as a **vector database**.
- Build and orchestrate LLM and document-processing workflows using Langflow.
- Implement asynchronous and distributed document processing tasks using **Celery and Redis** to support scalable background processing.
- Design APIs and backend services for integrating document extraction, transformation, retrieval, and AI processing components.
- Evaluate document parsing and **OCR** approaches for structured and unstructured documents to improve extraction quality and downstream AI processing.

TISCO

2026Technology Engineer/AI Engineer

Jan 2026 – Apr

- Prepared technical solution documents and coordinated cross-functional discussions with Infrastructure, Security, and Data Governance teams to align on system architecture and implementation.
- Facilitated technical meetings to ensure compliance with organizational standards and security requirements.
- Improve **Gemini OCR** prompt to save up costs and correctly determine photo copy or black and white copy.
- **PoC on LLM** calculate insurance premium by pure text based document without calling API for external function

Mobile AI

AI Project Manager & Software engineer

Sep 2025 – Dec 2025

- Led a team of two Computer Vision engineers to develop AI-based solutions.
- Prepared and maintained ISO-compliant documentation to support project governance and quality standards.

Siam Cement Group(SCG)

Django App Developer, System Analyst, LLM Application Developer

July 2024 – June 2025

- Developed an **LLM-powered chatbot** for Smart Living Home platform using Python-based backend services.
- Investigated and resolved **complex production issues in Django-based services**, reducing recurring defects.

AppSmiths Technology

Data Scientist, Python Developer

Jan 2021- Feb 2024

- **Replaced 80% of legacy AI classifiers** with new machine learning pipelines using Python and, improving accuracy and maintainability.
- Designed and implemented **numerical models** to estimate physical parameters such as liquid levels and speed of sound
- Implemented **GraphQL APIs using Django**, improving backend flexibility and data access efficiency
- Applied **parallel computing techniques** to accelerate scientific computations
- Evaluated deep learning architectures for real-world production applications

Aegon Insights (Thailand) Limited

Backend Engineer Manager(Technical Lead)

May 2019 – Dec 2020

- Designed backend architecture for **insurance platforms compliant with ISO 27001, PDPA, OIC, and IFRS17**
- Led backend engineering team and coordinated with business stakeholders
- Built scalable backend services using **Python, Django, GraphQL, and AWS**
- Established engineering best practices and system design guidelines

HBOT Co., Ltd.

Sep 2018 – March 2019

Machine Learning specialist & Software Engineer(Backend/Frontend/DevOps)

- Design and implement intelligent system powered by neural network not only RNN, but also CNN
- Analyze data and recommend decision based on given fact
- Train and test classifiers
- Maintain and secure Gitlab server, implement secure chat server, implement bot

MagicBoxAsia Co., Ltd

Nov 2017 – Aug 2018

Senior Software Engineer(Backend/Frontend/System/Business Analyst)

- Designed and implemented full-stack systems using **Python/Django and ReactJS**
- Implemented DevOps infrastructure including **Docker, CI/CD pipelines, and monitoring tools**
- Managed system performance monitoring and logging infrastructure

CODIUM Co., Ltd and CloudHM Co., Ltd

April 2016 – Oct 2017

Senior Software Engineer&Senior System Engineer

- Built and maintained
- Customer support
- On-site infra-technical support

4All Solution Inc

June 2015 – April 2016

Android & iOS Programmer/System Engineer/DBA

- iOS, Android, Nodejs, PL/pgSQL, TDD, LaTeX, Scientific Drawing, and do exam problems&solutions
- Create webserver APIs backend by Javascript with various framework, and do unit testing
- Install, Implement GNU/Linux Debian and PostgreSQL

Dalian CHENGSI Technology (Thailand) Co., Ltd.

November 2011 – April 2015

Project Leader/Consultant/UI Designer

- Digest customer requirements and prepare spec to Chinese software engineer
- Support Manufacturing and purchasing module. IFS7.5 JATCO (Nissan part supplier)
- Support Manufacturing and Finance. IFS2004 Calsonic Kansei (Nissan part supplier)

Faculty of Information and Communication Technology (ICT)

July 2010 – July 2011

Researcher and System Administrator (Linux Cluster)

- Maintain resource of cluster for 400 users per semester
- Routine check on the devices
- Conduct a research in parallel computing

National Institute of Methodology Thailand (NIMT)

September 2009 – June 2010

Metrologist at Mechanical lab, Sound Level Meter

- Maintain laboratory condition to meet the ISO standard for example: temperature, humidity
- Maintain customer device condition ex: temperature
- Perform a test check base on ISO standard

TECHNICAL SKILLS

AI / Machine Learning

PyTorch, scikit-learn, LangChain, LangGraph, Langflow, RAG, LLM Applications, Document AI, OCR Pipelines

Document Processing & Vector Search

Docling, Weaviate, Document Parsing, Metadata Extraction, Semantic Search

Backend Development

Django, FastAPI, REST APIs, GraphQL, Celery, Redis

Cloud & DevOps

Docker, AWS (EC2, RDS, S3, Aurora), GCP (Compute Engine, Vertex AI, Gemini API), CI/CD, Traefik

Databases

PostgreSQL, PostGIS, MySQL, Weaviate

Frontend / Mobile

EDUCATION

Mahidol University, Faculty of Information and Communication Technology

April 2012

Master of Science in Computer Science

- Master thesis: 2D lattice simulation of stock market
The objectives were to study the behavior of stock market and then we will extract the information by using another algorithm for example Dynamic Time Wrapping to gain the information from it.
- Received a working scholarship as a researcher and Linux Cluster System Engineer

Mahidol University, Faculty of Science

March 2008

Bachelor of Science, Physics

- Senior Project: Fractal antenna
The objectives were to study and develop the effectiveness of antenna for example impedance, radiation pattern, size and iteration times.
- Received a working scholarship from National Institute of Metrology Thailand (NIMT)

Licenses & Certifications

- Generative AI with Large Language Models. DeepLearning.AI. Credential ID 29GRSN6V9WP8. Feb 2025
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization. DeepLearning.AI. Credential ID D4KAODGBMEIS. Jan 2025
- Neural Networks and Deep Learning. DeepLearning.AI. Credential ID WTOLKWYJ90FU. Dec 2024
- Secured Generative AI Development. IMC Institute. 28-29 Nov 2024

INTERESTING

- Machine Learning, Artificial Intelligence
- Social Media

Selected Projects

- Crypto Trend Analyzer
 - Telegram bot that analyzes Twitter sentiment to detect crypto market trends.
- Dating App
 - Co-founded a dating platform built with Django REST API and Flutter mobile frontend.
- Appointment scheduler
 - Co-founded an appointment platform to support chatbot agent

FUNCTIONAL PROGRAMMING/DESIGN PATTERNS

- Easy to do unit testing and maintenance.
- Hand on experience :
 - Singleton : For passing variable between android activity
 - MVC : Common practice
 - Factory : Easily mock the object from it

STRENGTHS

- Good communication
- Good oral, written & presentation skills
- Good team player
- Like making test cases, A.I. stuff
- TOEIC 720: Listening 355/Reading 365, Oct 24th 2014.

PERSONAL INFORMATION

- Date of Birth : 4th July 1985
- Hobby: Reading
- Nationality : Thai
- Languages Known : Thai, English

Sarit Ritwirune

7 July 2026
